

CHARACTERISTICS

- + Meets all the requirements of the European Union regulation.
- + Compared to cow's milk, goat's milk is much easier to digest, has a different composition and structure of the fats and oligosaccharides which are more similar to breast milk; contains a very small ratio of alpha s1-casein (main allergen in cow's milk).
- + Contains high quality goat's milk which is fortified with all necessary vitamins, minerals and other ingredients, such as omega-3 (DHA) and omega-6 fatty acids (LA & ALA), nucleotides.
- + All ingredients are in ideal composition for proper baby development.
- + Calcium and vitamin D are needed for normal growth and development of bone in children.
- + Contain goat's lactose, no residua of cow milk protein.
- + Do not contain palm oil.
